

Calculus BC

Instructions: You will need to go to Barnes and Nobles or any online resource and obtain a copy of the latest version of Barron's AP Calculus Review for Calculus AB & BC.

Over the summer, you will need to complete the **Diagnostic Test Calculus AB** and bring me your answers (not corrected) on Tuesday, August 30, 2016. You will then read and take notes on **Chapter 1: Functions** and complete the multiple choice at the end of the section. Look over the section on **Parametric and Polar Functions** and attempt the multiple choice; we will begin with this on Wednesday ☺ Expect your first assessment on Friday, September 2nd on Functions including Parametric and Polar Functions.
